

## **MT. HOPE ROAD RECONSTRUCTION PROJECT**

**Mt. Hope Road** – Farm Lane to Okemos Road: Road reconstruction and drain crossing replacement to be performed. Meridian Charter Township. Federal Urban STP funding. Estimated Cost: \$1.5 million. Work on Mt. Hope Road is anticipated to start the week of Aug 30. Work will begin between **Hagadorn Road** and **Comanche Drive**. We expect that the first week of construction work on Mt. Hope Road will be conducted under lane closures only. Motorists should anticipate full closure of Mt. Hope Road both east and west of Hagadorn Road starting Tuesday September 7.

After September 7, Mt. Hope Road between Hagadorn and Comanche drive will be closed to thru traffic during construction. The road will be impassible at the Herron Creek Drain, approx 1500 ft east of Hagadorn (Between Herron Drive and Hawthorne Lane). Montessori School traffic will need to approach from the east (Okemos Road) during this period. **We anticipate that this section will be closed until mid October.**

**Mt. Hope Road between Farm Lane and Hagadorn Road will be closed to all traffic from 9/7 to 9/17**, and should be open w/ 4 lanes by the 9/18 MSU home football game.

Much of the remaining work between Comanche and Okemos Road, will be performed under lane closures or in conjunction with the above closures. Hagadorn Road will be fully open to traffic through the Mt. Hope Road intersection during all construction phases; only exception will be for short duration lane shifts for top course paving through the intersection near the project completion.

We anticipate that Mt. Hope Road will be re-opened to thru traffic by late October, with top course paving, sidewalk, and turf restoration to be completed with lane closures; Project completion by **mid-late November.**
