WILLIAMSTON ROAD RECONSTRUCTION NOTICE

Dear Resident:

As you are aware the Ingham County Road Commission has begun construction activities on Williamston Rd. between the Williamston City limits and Haslett Road. In general, most of the underground work has been completed and the project is ready to move into the next phase. The next phase includes, but is not limited to, cutting a hill just south of Haslett Road, trenching out the existing shoulders to allow for the road widening to take place, and performing a recycling procedure utilizing the existing roadway pavement. The work requires closing Williamston Road to thru traffic between Sherwood and Haslett Roads.

This closure should not affect most of the property owners who live within the project limits from accessing their property from either direction, except when the hill cut work south of Haslett Road (at the red barn on the west side) begins later this week. There will be no access provided through this 400 foot long construction zone, either northbound or southbound, during the hill cut work. Detour signing will be placed to direct traffic around the work zone before Williamston Road is closed to traffic. The hill cut should be completed and the road opened to local traffic by the end of the day May 9th, depending on weather conditions.

Initially, the next phase of construction was not to begin until June 5th 2009. However, with the cooperation of the school district, the contractor performing the work has put forth a new schedule to potentially complete all construction activities by mid-June, which is over one month ahead of the original completion date. The mid-June completion date is tentative and is subject to change based on field and weather conditions.

We appreciate your patience as we continue to progress through the reconstruction of Williamston Road. Please feel free to contact us with any questions or concerns you may have regarding the project. You may also stay up to date on the construction by visiting our website www.inghamcrc.org which is updated regularly with information about all construction activities being performed within the Road Commission's jurisdiction.

Summer office hours: 6:30 AM to 5:00 PM

Monday through Friday 6:30 AM to 5:00 PM (517) 676-9722 ext. 318

Off hours or Saturday and Sunday (517) 676-9655 ext. 318
